

## **TECHNICAL RIDER GUIDO MOEBIUS:**

- 1 x mono DI Box

- 1 x monitor

- 2 x chairs without arm rests

- when there will be more acts performing on one stage:

One carpet or thin plank 2x2 meters minimum for quick changeover. The plank must not be thicker than 1 cm. Möbius will set up his pedals on the carpet or plank, so his equipment can be dragged or carried on and off stage easily. Please note that a carpet is useless when stairs have to be climbed, because it is impossible to carry the equipment on a carpet. A carpet with the equipment on it can only be dragged over an even ground. When there is stairs between the stage and the place where the equipment can be stored before and after the concert, Möbius needs a plank instead of a carpet in order to carry the equipment.

## **VISUALS:**

- 1 x Video Beamer

- cable long enough that it reaches from the camcorder on stage floor up to Video Beamer

- 1 x screen
